

BIO-SIMPLEX™ POLYPROPYLENE CARBOYS

NEW

Saint-Gobain Performance Plastics introduces Bio-Simplex™ Polypropylene Carboys for advanced liquid handling and solution storage for general laboratory, process development and bioproduction applications. Saint-Gobain offers six popular sizes of carboys: 2.5 L, 5 L, 10 L, 20 L, 40 L and 75 L manufactured from high quality polypropylene. The Polypropylene carboy is suitable for temperatures from -40°C to 121°C, is BPA free, gamma compatible and is component certified to meet 21 CFR 177 for indirect food contact and USP Class VI Plastics.

The carboy's body includes design features that allow the user to easily hold, lift, fill, and pour while the versatile EZ Top® Container Closure technology provides interchangeable and leak-proof top connections. The Bio-Simplex™ Carboys are available with or without an autoclavable spigot. They also feature easy-to-read certified graduation marks with ± 5% accuracy, large molded marks for clearly identifiable volume and material. The Bio-Simplex™ system—carboy, cap, and spigot is autoclavable.

Features and Benefits:

- ◆ Slender ergonomic body design requiring less space in the laboratory
- ◆ Large top handles for full hand grip
- ◆ Bottom handles for secure grip when holding and transporting
- ◆ Minimum dead volume for maximum solution recovery
- ◆ Wide mouth for easy filling and cleaning
- ◆ Volume and material identification marks
- ◆ Large, easy to read graduation marks with ± 5% accuracy
- ◆ Open/closed version of cap with replaceable gasket
- ◆ Autoclavable spigot with interchangeable option

Saint-Gobain Bio-Simplex™ Carboys are also offered with EZ Top® Container Closure Assemblies, providing an aseptic seal for fluid transfer, available in C-Flex® thermoplastic elastomer or Sani-Tech® silicone. See page 2 for further details.

EZ TOP® CONTAINER CLOSURE ASSEMBLIES

The EZ Top® Container Closure is used to create a complete container assembly when combined with cap and container. This economical assembly, designed for single use, can successfully replace stainless steel closures and eliminate costs such as cleaning, validation and assembly, and the contamination from repeated use.

EZ TOP® CONTAINER CLOSURES USING C-FLEX® TPE OR SANI-TECH® SILICONE MATERIALS

EZ Top® Container Closures can be manufactured from C-Flex® pharmaceutical grade resin and tubing or fully characterized Class VI high-purity, platinum-cured Sani-Tech® silicone. Both ensure an unobstructed fluid path, extremely low level of extractables, and provide an elastomeric aseptic seal against glass, plastic, and metal surfaces. The one-piece construction eliminates product loss and contamination due to loose connection. The smooth inner bore eliminates risk of product entrapment and buildup.

EZ Top® Container Closures allow easy retrofit of your existing glass or plastic carboys for aseptic fluid transfer, sampling or sealing. C-Flex® Closures contain tubing with standard plug and fitting, a Bio-Simplex™ Flex Joint™, 0.2 µm vent filter, and cap. Closure inserts of Sani-Tech® silicone are available with or without silicone tubing or sanitary dip tubes. Standard two or three port configurations are available to fit all sizes of Bio-Simplex™ carboys.
